PRODUCT NOTES

Artisan Variations

The artisan technique used in our mouth-blown glass and hand-made ceramics collection creates unique pieces, some of which may feature characteristics of hand-crafted manufacturing (i.e. variations) and customers are asked to bear this in mind, particularly when ordering multiples.

Light Bulbs

The brightness of low energy eco light bulbs is measured in lumens. 400 lumens are considered suitable for table lamps and between 1,500 and 3,000 total lumens (which can come from multiple bulbs) is considered as suitable for a living room. Old-style incandescent 25W light bulbs roughly equate to 220+ lumens, 40W to 400+ lumens, 60W to 700+ lumens, 75W to 900+ lumens and 100W = 1300+ lumens.

Suitable use

Products are not suitable for outdoor use unless specifically stated. Certain products or fabrics are not recommended for use in public spaces or other high-intensity environments. Please speak with a member of the sales team to understand suitability of our products for the required application prior to placing an order.

For more detailed technical product information, please contact Established & Sons for a product-specific technical sheet.
